# 2023

#### **Direct costs for the Wholesale Trade industry:**

Total for non-fatal workers compensation claims with more than five days away from work.

## **Workplace Safety Index: Wholesale Trade**

Percent of industry's total

**Cost in billions** 

Annual report from Risk Control Services

The U.S. Wholesale Trade industry loses nearly \$4.19 billion a year to serious, nonfatal workplace injuries.

The top five causes

	Cost in billions	Percent total	
1.	\$1.32	31.5%	Overexertion involving outside sources  (handling object)
2.	\$0.53	12.7%	Falls to lower level
3.	\$0.52	12.4%	Falls on same level
4.	\$0.34	8.1%	Struck by object or equipment (being hit by objects)
5.	\$0.27	6.4%	Other exertions or bodily reactions (awkward postures)

#### Are these injuries just the cost of doing business?

Risk is often a part of doing business, but understanding the risk and having controls in place can help protect your workers and your bottom line. Have you done all you can to help mitigate the risk of these injuries?

### Ask yourself

Do we train workers to avoid excessive bending?

Do we require workers to utilize fall prevention systems when elevated?

Do we use mechanical aids or tools to secure heavy objects?

The experienced specialists of Risk Control Services understand the complexity of the Wholesale Tradeindustry — and the risks involved.

Scientific methodology: The Liberty Mutual Workplace Safety Index is based on information from Liberty Mutual, customized data from the U.S. Bureau of Labor Statistics (BLS) Office of Safety, Health, and Working Conditions, and the National Academy of Social Insurance (NASI). BLS non-fatal injury data are analyzed with the Liberty Mutual data to determine which events caused employees to miss more than five days of work, and then to rank those events by workers compensation costs, which are then scaled to the NASI total cost. To capture accurate injury cost data, each index is based on data three years prior. Accordingly, the 2023 index reflects 2020 data.
